Education

Software & Embedded Systems Bachelor and Engineering degree

— Higher Institute of computer science (ISI)

📅 Sep 2017 - Oct 2023

Experience

Savino Del Bene — FullStack Web Developer

📅 Dec 2025 - Present

React Tanstack Router Tanstack query Fastify oRPC Turborepo Typescript

- Architected a high-performance monorepo platform (5 integrated apps) using Turborepo and oRPC, ensuring 100% end-to-end type safety
- Engineered mission-critical logistics engines for global Shipments and Purchase Orders, digitizing the core operational and financial workflows for a global freight forwarding leader.

SuperHost — FullStack Web Developer

📅 Juin 2025 - Nov 2025

React Next.js Express MySQL Tanstack query

- Migrated react apps to vite and nextjs (frontend and backoffice)
- Improved performance and UX with caching and loading in accommodation page using tanstack query
- Improved SEO by creating a script that generates dynamically the sitemap and robots files and by fixing bad practices in pages and components.

Alinaous (GreenToDrive) — FullStack Web Developer

📅 Nov 2024 - May 2025

Angular Express MongoDB Stripe Expo/React Native Wordpress/Prestashop

- Implemented multi-role authentication (Admin, Renter, Client) with protected page guards.
- Integrated Stripe payments with Connected Accounts, enabling transaction fee splitting between the application owner and renters.
- Enabled online contract signing between renters and clients using BoldSign.

Practicode (EvOwn) — FullStack Web Developer

📅 May 2024 - Aug 2024

Next Typescript Firebase Google Maps api Tailwindcss Stripe

- Developed Evown, an application for managing electric car drivers and charging station owners.
- Implemented reservation, real-time chat, and payment functionalities.

Tulpen Solutions (Vapiano) — FullStack Web Developer

📅 Sep 2023 - Jun 2024

React Express Typescript Nest MongoDB Firebase RabbitMQ GraphQL

- Improved a German based restaurant (**VAPIANO**) system : backoffice for restaurant managers to manage resources, a menu for clients to place orders, and a real-time kitchen app for chefs to receive and update order statuses.
- Refactored the whole system with type-safe microservices architecture communicating through message queues on the backend and added server side rendering on the frontend

Skills & Tools

Languages

Typescript JavaScript GO C++

Frontend technologies

Next.js Astro.js Tailwindcss Lit Web Components Tanstack query
Zustand Redux toolkit Motion

Backend technologies

Express.js Nest.js RabbitMQ Firebase MongoDB PostgreSQL

Certifications

- KodeKloud: Advanced Linux, Shell scripting, Ansible, docker, advanced kubernetes, Jenkins, Terraform, AWS
